

# **CONSUMER PRICE INDEX**

#### January 2020

#### INFLATION UP

Consumers paid 1.0 per cent more in January 2020 than they did a year ago for the basket of goods and services included in the Consumer Price Index (CPI). The level of inflation increased 0.5 percentage points from December 2019.

Between December 2019 and January 2020, the average cost of goods and services in the CPI rose 0.9 per cent. The all-items index increased from 105.4 to 106.3 in January. This means that the basket of goods and services that cost \$100.00 in April 2015 now costs \$106.30.

#### YEAR-TO-YEAR ANALYSIS

The Health & Personal care sector continued to be the largest contributor to the twelve-month increase in the CPI. On average, the cost of Health & Personal care items increased 4.1 per cent year-overyear.

The Food and Rent sectors also impacted strongly on the annual rate of inflation, as price shifts in these sectors were 2.4 per cent and 0.7 per cent, respectively.

# **MONTH-TO-MONTH ANALYSIS**

## **Transport & Foreign Travel**

The Transport & Foreign Travel sector accelerated 2.2 per cent in January. The average cost for overseas travel rose substantially. Increased prices were reported in airfares (+6.9 per cent), overseas hotels (+6.4 per cent) and car rentals (+5.8 per cent).

### Fuel & Power

The Fuel & Power sector jumped 6.4 per cent for the month as the fuel adjustment clause increased 21.3 per cent.

#### Rent

Following no price movement in December, the Rent sector was up 0.9 per cent for the month. The average cost of properties not subject to rent control rose 1.7 per cent.

# **Clothing & Footwear**

The Clothing & Footwear sector was unchanged.

# COMPUTING PRICE INCREASES

The Department of Statistics receives calls daily requesting the rate of inflation over specific periods of time. The following calculations are provided to guide users as to how to compute rates of price increases. The monthly index numbers can be obtained from our website: <u>https://www.gov.bm/department/statistics.</u>

#### A) Month-to-Month Price Change

The price change between November and October, 2015 is calculated as Follows:

 $= \frac{\text{Nov15 index} - \text{Oct15 index}}{\text{Oct15 index}} \times 100$ 

 $=\!\frac{100.5\!-\!100.6}{100.6}\!\times\!100$ 

= -0.1%

# B) Year-to-Year Price Change

The price change between December 2015 and December, 2014 is calculated as follows:

 $= \frac{\text{Dec } 15 \text{ index} - \text{Dec } 14 \text{ index}}{\text{Dec } 14 \text{ index}} \times 100$ 

 $=\frac{100.5-98.7}{98.7}\times100$ 

$$=1.8\%$$

#### Food

On average, food prices increased 0.8 per cent in January. Among the items contributing to the increase were mayonnaise (+7.3 per cent), ground beef (+4.5 per cent) and preserved meats (+3.9 per cent).

### Household Goods, Services & Supplies

The Household Goods, Services & Supplies sector increased 0.3 per cent for the month. The average cost of childcare services rose 4.3 per cent.

# Education, Recreation, Entertainment & Reading

The Education, Recreation, Entertainment & Reading sector edged up 0.1 per cent in January in response to a 2.4 per cent rise in pet food prices.

# Health & Personal Care

Despite the 1.0 per cent rise in the average price of self-prescribed medicines and household medical supplies, the Health & Personal Care sector was unchanged.

### **Tobacco & Liquor**

Tobacco & Liquor sector declined 0.4 per cent in January. The average price of wines fell 1.5 per cent.

#### **C)** Particular Period Price Change

The price change between April 2014 and January, 2016 is calculated as follows:  $= \frac{Jan \ 16 \text{ index} - Apr 14 \text{ index}}{Apr 14 \text{ index}} \times 100$ 

$$=\frac{100.3-98.3}{98.3}\times100$$

= 2.0%

#### **APRIL** 2015 = 100

# WHAT IS THE CONSUMER PRICE INDEX?

The Consumer Price Index (CPI) is a statistical tool used for measuring changes in the general level of prices of consumer goods and services purchased by private households.

The index measures price movements of a given quality and quantity of goods and services. The mix of these consumer goods and services comprising the index, are figuratively thought of as a "shopping basket." In constructing this "shopping basket", the selected goods and services are organized first by commodity type. They are then divided into subcomponents and assigned to a major expenditure group. The Bermuda CPI is structured into nine expenditure groups or sectors:

- Food
- Rent
- Clothing & Footwear
- Tobacco & Liquor
- Fuel & Power
- Transport & Foreign Travel
- Household Goods, Services & Supplies
- Education, Recreation, Entertainment & Reading
- Health & Personal Care

# **CONCEPTS AND DEFINITIONS**

#### **Base Period**

The time period which is used as a reference point for measuring the price change of goods and services. The base period for the Bermuda CPI is April 2015.

#### **Price Index Number**

A single figure that shows how a set of prices has changed over a specified period of time. An index number on its own means nothing. It must be compared with an index number from another period to have meaning. For example, a comparison of the index number 97.2 for January 2014 with 100.4 for January 2016, reveals that prices have increased by 3.3 percent.

## **Laspeyres Equation**

The CPI is computed using this statistical equation. This formula calculates the total amount of money a household needs today to purchase the same basket of goods and services that it bought in the base period, April 2015.

# WEIGHTED AVERAGE

A mathematical formula that takes into account the relative importance of an item's price change compared to the overall change in the sector or CPI.

## Inflation

Inflation is the process of rising prices, resulting in diminishing purchasing power of a given sum of money.

#### **Cost of Living Index**

Many individuals refer to the CPI as a cost-of-living index. The CPI is an index of pure price change only. A cost-of-living index reflects the changes in buying or consumption patterns that consumers would ordinarily make to adjust to any change in the price of a good or service.

### A COMPARISON OF RATES OF INFLATION (%) Selected Countries & Bermuda

|                             | 2016 | 2017 | 2018 | 2019 | Jan 20 |
|-----------------------------|------|------|------|------|--------|
| Bermuda                     | 1.5  | 1.9  | 1.4  | 1.0  | +1.0   |
| United States <sup>1</sup>  | 1.3  | 2.1  | 2.4  | 1.8  | +2.5   |
| Canada <sup>2</sup>         | 1.4  | 1.6  | 2.3  | 1.9  | +2.4   |
| United Kingdom <sup>3</sup> | 1.8  | 3.6  | 3.3  | 2.6  | +2.7   |
